

Microdermabrasion

The appearance of fine lines and wrinkles, sun damaged skin, acne and acne scars can be significantly reduced while stimulating the production of new collagen.

Your microdermabrasion can be customized to meet your needs by including an acid peel to minimize the appearance of fine lines and wrinkles, scarring, uneven skin tones, sun spots or acne.

Customized Facials

Facial treatments will be customized, targeting the concerns of your skin by using steam, lymphatic drainage and extractions. Specific highly concentrated enzymes and serums are used to address your particular needs. Unlike commercial products containing chemical additives that are often harmful to your skin, our natural therapeutic treatments combine the purity and potency of nature's healing agents.

Spider Vein Reduction

The GentleYAG® laser creates a high-intensity beam of light that is able to penetrate deep within the skin tissue, targeting hemoglobin in the blood vessels.

The GentleYAG® laser, has its own patented Dynamic Cooling Device that helps to protect the skin during spider vein reduction.

Sclerotherapy

Sclerotherapy is also used to reduce spider veins. It is the injection of a mild sclerosing agent into the vein with a needle so thin that it is barely felt. Your practitioner will determine which procedure will give you the best results.

Skin Rejuvenation

Photo rejuvenation helps your skin look younger by reducing damage from the sun or sun spots (brown spots) by decreasing redness and improving the texture of your skin. IPL stimulates the production of collagen, tightens the skin, reduces wrinkles, evens skin tone and color, and helps to shrink large pores.

Skin Tightening & Wrinkle Reduction

The GentleYAG® laser delivers a thermal stimulus within the dermis, initiating new collagen formation.

The GentleYAG® laser is used for tightening the skin of the face and neck. Other areas of the body, such as the abdomen, thighs and arms also respond well to the tightening and collagen rebuilding effects.

Non-Surgical Facial & Body Sculpting

Beautiful Image Facial & Body Sculpting is a safe and effective way to gently tighten and firm the skin. It involves conducting wands that emit micro-currents. The currents penetrate the layers of the skin following lymphatic drainage sites causing increased production of collagen to smooth and soften lines.

Laser Hair Removal

The GentleYAG® laser penetrates deep into the skin tissue, targeting melanin in the hair. Razor bumps (psuedofolliculitis barbae) can often be eliminated with laser reduction of hair. We are able to reduce the hair on any body part, or, if you prefer, the entire body.

The GentleYAG® laser can also be used for hair removal on darker skin types, including Hispanic, Native American and African American Skin.

Injectables

Botox®

Dynamic wrinkles are those that are the result of facial expressions. Botox® reduces dynamic wrinkles by relaxing the underlying muscles.

Juvederm®

Hyaluronic acid is normally produced by the skin to give it volume and shape. Juvederm® is a synthetic material that is very similar to hyaluronic acid and is used to fill nasolabial folds (laugh lines) and marionette lines, and add fullness to the lips.

Radiesse®

Radiesse® is a synthetic compound in an aqueous gel. Radiesse® is used to reduce lines between the nose and the mouth, and to fill blemishes such as scars left by acne. Radiesse® can also be used to restore the natural contours of the cheeks and jaw and improve the shape of your nose.

Weight Management Program

Our weight management program is more than a diet. This is a program that is intended to improve your quality of life and health. We combine extensive nutritional information and exercise plans with weight loss supplements in an effective, medically supervised plan.

Cosmeceuticals

Whatever your skin type, problem or concern, we have a skin care line developed especially for you.

Obagi® Condition & Enhance System™

The Obagi® skin care line is a physician grade cosmeceutical line designed especially for each client. The Obagi® System corrects skin discolorations, premature damage, reduces future damage and creates healthier skin that looks and acts younger.

Obagi-C® Rx System™

The Obagi-C Rx System regulates the production of melanin, enhances collagen production and minimizes the skin cell damage resulting in brighter, smoother skin. The Obagi-C Rx System is the only physician grade Vitamin C System for "Photolumines" Skin.

Obagi® Clenziderm™

Obagi Clenziderm is a prescription strength, three-step acne system that provides clinically proven acne control, resulting in visible improvement in acne-prone skin. Also, because we are a medical office, we can add oral antibiotics to your acne treatment if necessary.

Elastiderm Décolletage System

This revolutionary skin care system is designed to reduce discoloration and age spots, as well as minimizing fine lines and wrinkles on the delicate skin of the chest and neck area. After maintaining your facial aesthetics, don't let your décolletage reveal your true age.

Colorescience®

Real Minerals. Real Simple. Real Results.™

Colorescience is a physician quality makeup that Colors, Protects and Corrects the skin with a veil like quality, but without a heavy "made-up" appearance. Colorescience protects with SPF 20 and 30 protective face colors, shielding your skin from the harmful effects of the sun. Finally, Colorescience corrects gives a flawless appearance. A full line of makeup is available and our Aesthetician will help you find the perfect color combination for you.
